# Index of Subjects

Adenovirus, a large outbreak of keratoconjunctivitis due to, type 8, 285
Adenovirus, investigation of an outbreak of, type 3 infection in a boys' boarding school, 277
Amino acids, use of an ammonia electrode to study deamination of, with special reference to D-asparagine breakdown by campylobacters, 189
Ammonia electrode, use of an, to study bacterial deamination of amino acids with special reference to D-asparagine breakdown by campylobacters, 189
Ampicillin, binding to and antibacterial effect of, neomycin and polymyxin B on human faeces, 27
Arginine metabolism in infected cell cultures as a marker character for the differentiation of orthopoxviruses, 213
Avoparcin, the effect of feeding diets containing, on the excretion of salmonellas by chickens experimentally infected with natural sources of salmonella organisms, 439

Bacteriocin, produced by certain M-type 49 *Streptococcus pyogenes* stains when incubated anaerobically, 339
Bluetongue, isolation of, and related viruses from *Culicoides* spp. in the Sudan, 621

Calicivirus, an outbreak of, associated gastroenteritis in an elderly persons' home. A possible zoonosis? 293
*Campylobacter jejuni*, a search for the source of, in milk, 333
*Campylobacter jejuni*, epidemiological investigations on, in households with a primary infection, 325
Campylobacters, use of an ammonia electrode to study bacterial deamination of amino acids with special reference to D-asparagine breakdown by, 189
*Clostridium difficile*, prospective study of, colonization and para-cresol detection in the stools of babies on a special care unit, 17
*Corynebacterium diphtheriae*, special feature, 395
*Corynebacterium suis*, the carriage of, in male pigs, 381
Corynephages, conversion by, and its role in the natural history of diphtheria, 405
Coxsackie A16, a survey of, virus antibodies in human sera, 205
Coxsackie B, a study of, virus infections, 1972–1983, 197
Crohn's disease, induction in rats of serum agglutinins to *Eubacterium*, *Peptostreptococcus* and *Coprococcus* species by the faecal flora from patients with, and healthy subjects, 345
*Cryptosporidium*, the development and performance of a simple, sensitive method for the detection of, oocysts in faeces, 317
*Culicoides* spp., isolation of bluetongue and related viruses from, in the Sudan, 621

D-asparagine, use of an ammonia electrode to study bacterial deamination of amino acids with special reference to, breakdown by campylobacters, 189
Diphtheria bacillus, the, and its toxin: a model system, 397
Diphtheria, conversion by corynephages and its role in the natural history of, 405
Diphtheria in Europe, 433
Diphtheria in North America, 419
Disinfectants, inactivation of human rotavirus, SA11 and other viruses in effluent by, 157
Disinfection, a microbiological study of various food premises with an assessment of cleaning and, practices, 365

Enteric viruses, inactivation of human rotavirus, SA11 and other, in effluent by disinfectants, 157
Equine influenza, development of an enzyme-linked immunosorbent assay (ELISA) for the detection of specific antibodies against an H7N7 and an H3N8, virus 609
Erythema infectiosum, an outbreak of, associated with human parvovirus infection, 85

*Escherichia coli*, antibiotic resistance in, causing generalized infections in chickens in the UK in 1982: the relationship between the results of *in vitro* and *in vivo* furazolidone sensitivity tests, 445
*Escherichia coli*, antimicrobial resistance and the ecology of, plasmids, 181
*Escherichia coli*, hepatitis B core antigen synthesised in: its use for antibody screening in patients attending a clinic for sexually transmitted diseases, 225
*Escherichia coli*, the persistence of drug resistant, strains in the majority faecal flora of calves, 547

Faecal flora, induction in rats of serum agglutinins to *Eubacterium*, *Peptostreptococcus* and *Coprococcus* species by the, from patients with Crohn's disease and healthy subjects, 345
Field mouse, laboratory trials of three anticoagulant rodenticides for use against the Indian, *Mus booduga* Gray, 575
Flavivirus, evidence for, outside of the distribution area for *Ixodes ricinus* in Norway, 133
Food poisoning, unusually severe, from vanilla slices, 377
Food premises, a microbiological study of various, with an assessment of cleaning and disinfection practices, 365
Foot and mouth disease, the effect of vaccination regimen on the transfer of, antibodies from the sow to her piglets, 123
Furazolidone, antibiotic resistance in *Escherichia coli* causing generalized infections in chickens in the UK in 1982: the relationship between the results of *in vitro* and *in vivo*, sensitivity tests, 445

Gastroenteritis, an outbreak of calicivirus associated, in an elderly persons' home. A possible zoonosis?, 293
Gentamicin resistance, occurrence of a nonplasmid-located determinant for, in strains of *Staphylococcus aureus*, 1
Gentamicin, stability of aminoglycoside resistance *in vitro* in, -resistant *Staphylococcus aureus*, 43

Hepatitis, a sero-epidemiologic study of a water-borne epidemic of viral, in Kolhapur City, India, 113
Hepatitis A, towards a, vaccine. A review, 269
Hepatitis B core antigen synthesised in *Escherichia coli*: its use for antibody screening in patients attending a clinic for sexually transmitted diseases, 225
Hepatitis B, surveillance of, virus in Scotland, 1973-1982, 233
Herpes simplex, efficiency of the use of pock size on the choriallantoic membrane of fertile hen's eggs as a method of typing, viruses, 95

Infectious disease, oscillatory fluctuations in the incidence of, and the impact of vaccination: time series analysis, 587
Influenza A, interpretation of responses and protective levels of antibody against attenuated, viruses using single radial haemolysis, 301
Influenza, distribution of, viruses in Northern Greece during 1972–1983, 263
Influenza, epidemic, in Greater London, 105
Intravenous cannulae, the complications of, incorporating a valved injection side port, 497
*Ixodes ricinus*, evidence for flavivirus(es) outside of the distribution area for, in Norway, 133

Keratoconjunctivitis, a large outbreak of, due to adenovirus type 8, 285
*Klebsiella aerogenes*, vaccination against, 355

*Legionella pneumophila* in aerosols from shower baths, 349

Meat, a comparison of the original Rappaport medium (R medium) and the Rappaport–Vassiliadis medium (RV medium) in the isolation of salmonellae from, products, 51
Meningococcal infections in Scotland 1972–82, 167
*Mesocricetus auratus*, laboratory trials of five rodenticides for the control of, Waterhouse, 389
Milk, a search for the source of *Campylobacter jejuni* in, 333

Milk, frequency of isolation of entertoxigenic staphylococci from, of nursing mothers in Kaduna, Nigeria, 531
*Mus booduga* Gray, laboratory trials of three anticoagulant rodenticides for use against the Indian field mouse, 575
*Mycoplasma agalactiae*, experimental infection of castrated lambs with, 455
Mycoplasmas, a study of F38-type and related, by mycoplasmaemia and cross-immunization tests in mice, 465

Neomycin, binding to and antibacterial effect of ampicillin, and polymyxin B on human faeces, 27
Nephropathia epidemic in Norway: antigen and antibodies in rodent reservoirs and antibodies in selected human populations, 139
N. R. Grist, a tribute to, 165

Operating rooms, bacterial contamination of floors and other surfaces in: a five-year survey, 559
Operating suite, airborne contamination in an: report of a five-year survey, 567
Operations, infections and sepsis after, for total hip or knee-joint replacement: influence of ultraclean air, prophylactic antibiotics and other factors, 505
Para-cresol, prospective study of *Clostridium difficile* colonization, and detection in the stools of babies on a special care unit, 17
Parvovirus, an outbreak of erythema infectiosum associated with human, infection, 85
Peste des petits ruminants, the detection of, (PPR) virus antigen by agar gel precipitation test and counter-immunoelectrophoresis, 579
Pigs, the carriage of *Corynebacterium suis* in male, 381
Piry, susceptibility of various animals to the vesiculovirus, 147
Plasmid, occurrence of a non-, located determinant for gentamicin resistance in strains of *Staphylococcus aureus*, 1
Plasmids, antimicrobial resistance and the ecology of *Escherichia coli*, 181
Plasmids, identification of multiple-resistance (R) and colicinogeny (Col), in an epidemic *Salmonella agona* serotype in Rio de Janeiro, 79
Plasmids, interspecific co-transfer of antibiotic resistance, in staphylococci *in vivo*, 59
Pneumococci, antibiotic-resistant, in hospitalized children, 9
Polymyxin B, binding to and antibacterial effect of ampicillin, neomycin and, on human faeces, 27

Rappaport, a comparison of the original, medium (R medium) and the Rappaport– Vassiliadis medium (RV medium) in the isolation of salmonellae from meat products, 51
Rappaport–Vassiliadis, a comparison of the original Rappaport medium (R medium) and the, medium (RV medium) in the isolation of salmonellae from meat products, 51
Resistance, antibiotic, in *Escherichia coli* causing generalized infections in chickens in the UK in 1982: the relationship between the results of *in vitro* and *in vivo* furazolidone sensitivity tests, 445
Resistance, antimicrobial, and the ecology of *Escherichia coli* plasmids, 181
Resistance, identification of multiple-, (R) and colicinogeny (Col) plamids in an epidemic *Salmonella agona* serotype in Rio de Janeiro, 79
Resistance, interspecific co-transfer of antibiotics, plasmids in staphylococci *in vivo*, 59
Resistance, stability of aminoglycoside, *in vitro* in gentamicin-resistant *Staphylococcus aureus*, 43
Resistant, antibiotic-, pneumococci in hospitalized children, 9
Resistant, the persistence of drug, *Escherichia coli* strains in the majority faecal flora of calves, 547
Respiratory syncytial virus, a comparison of three vaccines against, in calves, 251
Rift Valley fever virus, preliminary survey domestic animals of the Sudan for precipitating antibodies to, 629
Rodenticides, laboratory trials of five, for the control of *Mesocricetus auratus* Waterhouse, 389
Rodenticides, laboratory trials of three anticoagulant, for use against the Indian field mouse, *Mus booduga* Gray, 575

Rotavirus, a cryptogram for recording, strains: the Rotacode, 237
Rotavirus, inactivation of human, SA11 and other enteric viruses in effluent by disinfectants, 157
Rotaviruses, the detection of, in products of wastewater treatment, 639

*Salmonella agona*, identification of multiple-resitance (R) and colicinogeny (Col) plasmids in an epidemic, serotype in Rio de Janeiro, 79
Salmonella, further observations on the excretion of, in the faeces of calves fed milk substitute, 539
Salmonellae, a comparison of the original Rappaport medium (R medium) and the Rappaport–Vassiliadis medium (RV medium) in the isolation of, from meat products, 51
Salmonellae, the effect of the use of different selective media on the ability to recover, from seagull faeces, 35
Salmonellas, the effect of feeding diets containing avoparcin on the excretion of, by chickens experimentally infected with natural sources of salmonella organisms, 439
Seagull, the effect of the use of different selective media on the ability to recover salmonellae from, faeces, 35
Selective media, the effect of the use of different, on the ability to recover salmonellae from seagull faeces, 35
*Serratia marcescens*, epidemiological and bacteriological investigation of, epidemic in a nursery and in a neonatal intensive care unit, 67
Serum agglutinis, induction in rats of, to *Eubacterium*, *Peptostreptococcus* and *Coprococcus* species by the faecal flora from patients with Crohn's disease and healthy subjects, 345
Sexually transmitted diseases, hepatitis B core antigen synthesized in *Escherichia coli*: its use for antibody screening in patients attending a clinic for, 225
Shower baths, *Legionella pneumophila* in aerosols from, 349
Staphylococci, frequency of isolation of enterotoxigenic, from milk of nursing mothers in Kaduna, Nigeria, 531
Staphylococci, interspecific co-transfer of antibiotic resistance plasmids in, *in vivo* 59
*Staphylococcus aureus*, occurrence of a nonplasmid-located determinant for gentamicin resistance in strains of, 1
*Staphylococcus aureus*, stability of aminoglycoside resistance *in vitro* in gentamicin-resistant, 43
*Streptococcus pyogenes*, a bacteriocin produced by certain M-type 49, strains when incubated anaerobically, 339

Total hip or knee-joint replacement, infection and sepsis after operations for: influence of ultraclean air, prophylactic antibiotics and other factors, 505

Uukuvirus, isolation of an English (family *Bunyaviridae*), 313

Vaccination against *Klebsiella aerogenes*, 355
Vaccination, oscillatory fluctuations in the incidence of infectious disease and the impact of: time series analysis, 587
Vaccination, the effect of, regimen on the transfer of foot and mouth disease antibodies from the sow to her piglets, 123
Vaccine, towards a hepatitis A. A review, 269
Vaccines, a comparison of three, against respiratory syncytial virus in calves, 251
Vanilla slices, unusually severe food poisoning from, 377
Vesiculovirus, susceptibility of various animals to the, Piry, 147

Wastewater, the detection of rotaviruses in products of, treatment, 639
Water, a sero-epidemiologic study of a, -borne epidemic of viral hepatitis in Kolhapur City, India, 113

# THE JOURNAL OF HYGIENE
